DETAILED ACTION

Drawings

Figure 21 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 6 are rejected under 35 U.S.C. 102(b) as being anticipated by Sato et al. (Japan, 2008).

Sato et al. discloses a color image forming device with forming plural pairs of toner marks (K_{11} and K_{12}), (K_{21} and K_{22}), (K_{31} and K_{32}) consisting of two toner marks of the same color and the same shape onto belt 14 that reads on the instant invention's transferring member. The pairs of toner marks of the same color are formed at an interval L on the photoreceptor which is half of the circumferential of the photoreceptor, then transferred onto the belt at intervals L'. Detecting devices 16, 18 are used to sense the marks. When the interval L' is different from interval L, then a fluctuation of the positional deviation of each color is detected and averaged. This reads on to step of

calculating means values of displacement amounts of the same color marks in different mark sets. The colors of each of the photoreceptor 1C, 1Y, 1M, and 1K, are cyan, yellow, magenta, and black. This is inherent from Fig. 2. Note abstract.

Allowable Subject Matter

Claims 2-5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 8-43 are allowed over the prior art of record.

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Toyofuku et al. (Japan, 830), Edge, Nakayasu et al., Mori et al., and Hayakawa disclose art in registration of color images.
